CONTENTS

Introduction: Enhancing Biological Control—Habitat Management to Promote Natural Enemies of Agricultural Pests	1
ROBERT L. BUGG, CHARLES H. PICKETT	
Definitions	1
Basis and Origin of the Practice	1
Complications in Research and Implementation	2
Integration with Other Aspects of Biological Control	4
Integration with Cultural Control	4
Vegetational Diversification	5
Diets of Biological Control Agents	8
Patterns of Natural Enemy Movement	10
Reducing Pesticide Dependency Through Integrated Farming	11
References	15
The Importance of Movement in the Response of Natural Enemies to Habitat Manipulation	25
