Modern Industrial Microbiology and Biotechnology

Nduka Okafor

Contents

Preface

vii

SECTION A INTRODUCTION

1. Introduction: Scope of Biotechnology and Industrial Microbiology	3
1.1 Nature of Biotechnology and Industrial Microbiology	3
1.2 Characteristics of Industrial Microbiology	4
1.2.1 Industrial vs medical microbiology	4
1.2.2 Multi-disciplinary or Team-work nature of industrial microbiology	4
1.2.3 Obsolescence in industrial microbiology	5
1.2.4 Free communication of procedures in industrial microbiology	5
1.3 Patents and Intellectual Property Rights in Industrial Microbiology and Biotechnology	5
1.4 The Use of the Word 'Fermentation' in Industrial Microbiology	9
1.5 Organizational Set-up in an Industrial Microbiology Establishment	10
<i>Suggested Readings</i>	13

SECTION B BIOLOGICAL BASIS OF PRODUCTIVITY IN INDUSTRIAL MICROBIOLOGY AND BIOTECHNOLOGY

2. Some Microorganisms Commonly Used in Industrial Microbiology and Biotechnology	17
2.1 Basic Nature of Cells of Living Things	17
2.2 Classification of Living Things: Three Domains of Living Things	18
2.3 Taxonomic Grouping of Micro-organisms Important in Industrial Microbiology and Biotechnology	19
2.3.1 Bacteria	21
2.3.2 Eucarya: Fungi	29
2.4 Characteristics Important in Microbes Used in Industrial Microbiology and Biotechnology	31
<i>Suggested Readings</i>	33

3. Aspects of Molecular Biology and Bioinformatics of Relevance in Industrial Microbiology and Biotechnology	34
3.1 Protein Synthesis	34
3.2 The Polymerase Chain Reaction	39
3.2.1 <i>Some applications of PCR in industrial microbiology and biotechnology</i>	41
3.3 Microarrays	42
3.3.1 <i>Applications of microarray technology</i>	43
3.4 Sequencing of DNA	44
3.4.1 <i>Sequencing of short DNA fragments</i>	44
3.4.2 <i>Sequencing of genomes or large DNA fragments</i>	46
3.5 The Open Reading Frame and the Identification of Genes	46
3.6 Metagenomics	48
3.7 Nature of Bioinformatics	50
3.7.1 <i>Some contributions of bioinformatics to biotechnology</i>	51
<i>Suggested Readings</i>	52
4. Industrial Media and the Nutrition of Industrial Organisms	54
4.1 The Basic Nutrient Requirements of Industrial Media	54
4.2 Criteria for the Choice of Raw Materials Used in Industrial Media	56
4.3 Some Raw Materials Used in Compounding Industrial Media	58
4.4 Growth Factors	62
4.5 Water	62
4.6 Some Potential Sources of Components of Industrial Media	63
4.6.1 <i>Carbohydrate sources</i>	63
4.6.2 <i>Protein sources</i>	65
4.7 The Use of Plant Waste Materials in Industrial Microbiology Media: Saccharification of Polysaccharides	66
4.7.1 <i>Starch</i>	67
4.7.2 <i>Cellulose, hemi-celluloses and lignin in plant materials</i>	73
<i>Suggested Readings</i>	76
5. Metabolic Pathways for the Biosynthesis of Industrial Microbiology Products	77
5.1 The Nature of Metabolic Pathways	77
5.2 Industrial Microbiological Products as Primary and Secondary Metabolites	78
5.2.1 <i>Products of primary metabolism</i>	78
5.2.2 <i>Products of secondary metabolism</i>	79
5.3 Trophophase-idiophase Relationships in the Production of Secondary Products	81
5.4 Role of Secondary Metabolites in the Physiology of Organisms Producing Them	82
5.5 Pathways for the Synthesis of Primary and Secondary Metabolites of Industrial Importance	83
5.5.1 <i>Catabolism of carbohydrates</i>	84
5.5.2 <i>The Catabolism of hydrocarbons</i>	88

5.6	Carbon Pathways for the Formation of Some Industrial Products Derived from Primary Metabolism	89
5.6.1	<i>Catabolic products</i>	89
5.6.2	<i>Anabolic products</i>	89
5.7	Carbon Pathways for the Formation of Some Products of Microbial Secondary Metabolism of Industrial Importance	89
	<i>Suggested Readings</i>	98
6.	Overproduction of Metabolites of Industrial Microorganisms	99
6.1	Mechanisms Enabling Microorganisms to Avoid Overproduction of Primary Metabolic Products Through Enzyme Regulation	100
6.1.1	<i>Substrate induction</i>	101
6.1.2	<i>Catabolite regulation</i>	103
6.1.3	<i>Feedback regulation</i>	105
6.1.4	<i>Amino acid regulation of RNA synthesis</i>	107
6.1.5	<i>Energy charge regulation</i>	107
6.1.6	<i>Permeability control</i>	108
6.2	Derangement or Bypassing of Regulatory Mechanisms for the Over-production of Primary Metabolites	109
6.2.1	<i>Metabolic control</i>	109
6.2.2	<i>Permeability</i>	114
6.3	Regulation of Overproduction in Secondary Metabolites	115
6.3.1	<i>Induction</i>	115
6.3.2	<i>Catabolite regulation</i>	115
6.3.3	<i>Feedback regulation</i>	117
6.3.4	<i>ATP or energy charge regulation of secondary metabolites</i>	117
6.4	Empirical Methods Employed to Disorganize Regulatory Mechanisms in Secondary Metabolite Production	120
	<i>Suggested Readings</i>	120
7.	Screening for Productive Strains and Strain Improvement in Biotechnological Organisms	122
7.1	Sources of Microorganisms Used in Biotechnology	122
7.1.1	<i>Literature search and culture collection supply</i>	122
7.1.2	<i>Isolation de novo of organisms producing metabolites of economic importance</i>	123
7.2	Strain Improvement	125
7.2.1	<i>Selection from naturally occurring variants</i>	126
7.2.2	<i>Manipulation of the genome of industrial organisms in strain improvement</i>	126
	<i>Suggested Readings</i>	170
8.	The Preservation of the Gene Pool in Industrial Organisms: Culture Collections	171
8.1	The Place of Culture Collections in Industrial Microbiology and Biotechnology	171
8.2	Types of Culture Collections	172

8.3	Handling Culture Collections	173
8.4	Methods of Preserving Microorganisms	173
8.4.1	<i>Microbial preservation methods based on the reduction of the temperature of growth</i>	174
8.4.2	<i>Microbial preservation methods based on dehydration</i>	176
8.4.3	<i>Microbial preservation methods based on the reduction of nutrients</i>	178
8.4.4	<i>The need for experimentation to determine the most appropriate method of preserving an organism</i>	178
	<i>Suggested Readings</i>	178
SECTION C BASIC OPERATIONS IN INDUSTRIAL FERMENTATIONS		
9.	Fermentors and Fermentor Operation	183
9.1	Definition of a Fermentor	183
9.2	The Aerated Stirred Tank Batch Fermentor	184
9.2.1	<i>Construction materials for fermentors</i>	185
9.2.2	<i>Aeration and agitation in a fermentor</i>	185
9.2.3	<i>Temperature control in a fermentor</i>	186
9.2.4	<i>Foam production and control</i>	188
9.2.5	<i>Process control in a fermentor</i>	192
9.3	Anerobic Batch Fermentors	195
9.4	Fermentor Configurations	196
9.4.1	<i>Continuous fermentations</i>	196
9.5	Fed-batch Cultivation	202
9.6	Design of New Fermentors on the Basis of Physiology of the Organisms: Air Lift Fermentors	202
9.7	Microbial Experimentation in the Fermentation Industry: The Place of the Pilot Plant	205
9.8	Inoculum Preparation	205
9.9	Surface or Solid State Fermentors	206
	<i>Suggested Readings</i>	206
10.	Extraction of Fermentation Products	208
10.1	Solids (Insolubles) Removal	209
10.1.1	<i>Filtration</i>	209
10.1.2	<i>Centrifugation</i>	210
10.1.3	<i>Coagulation and flocculation</i>	210
10.1.4	<i>Foam fractionation</i>	211
10.1.5	<i>Whole-broth treatment</i>	212
10.2	Primary Product Isolation	212
10.2.1	<i>Cell disruption</i>	212
10.2.2	<i>Liquid extraction</i>	213
10.2.3	<i>Dissociation extraction</i>	214
10.2.4	<i>Ion-exchange adsorption</i>	214
10.2.5	<i>Precipitation</i>	216

10.3	Purification	217
10.3.1	Chromatography	217
10.3.2	Carbon decolorization	217
10.3.3	Crystallization	218
10.4	Product Isolation	218
10.4.1	Crystalline processing	218
10.4.2	Drying	218
	<i>Suggested Readings</i>	220
11.	Sterility in Industrial Microbiology	221
11.1	The Basis of Loss by Contaminants	221
11.2	Methods of Achieving Sterility	222
11.2.1	Physical methods	222
11.2.2	Chemical methods	227
11.3	Aspects of Sterilization in Industry	229
11.3.1	The sterilization of the fermentor and its accessories	229
11.3.2	Media sterilization	229
11.4	Viruses (Phages) in Industrial Microbiology	230
11.4.1	Morphological grouping of bacteriophages	232
11.4.2	Lysis of hosts by phages	232
11.4.3	Prevention of phage contamination	232
11.4.4	Use of phage resistant mutants	234
11.4.5	Inhibition of phage multiplication with chemicals	234
11.4.6	Use of adequate media conditions and other practices	234
	<i>Suggested Readings</i>	234
SECTION D ALCOHOL-BASED FERMENTATION INDUSTRIES		
12.	Production of Beer	237
12.1	Barley Beers	237
12.1.1	Types of barley beers	237
12.1.2	Raw materials for brewing	238
12.1.3	Brewery processes	242
12.1.4	Beer defects	253
12.1.5	Some developments in beer brewing	255
12.2	Sorghum Beers	258
12.2.1	Kaffir beer and other traditional sorghum beers	258
	<i>Suggested Readings</i>	260
13.	Production of Wines and Spirits	262
13.1	Grape Wines	262
13.1.1	Processes in wine making	262
13.1.2	Fermentation	263
13.1.3	Ageing and storage	263
13.1.4	Clarification	264
13.1.5	Packaging	265

13.1.6	Wine defects	265	
13.1.7	Wine preservation	265	
13.1.8	Classification of wines	265	
13.2	Palm Wine		270
13.3	The Distilled Alcoholic (or Spirit) Beverages		274
13.3.1	Measurement of the alcoholic strength of distilled beverages	274	
13.3.2	General principles in the production of spirit beverages	275	
13.3.3	The spirit beverages	276	
	Suggested Readings	278	
14.	Production of Vinegar		280
14.1	Uses		280
14.2	Measurement of Acetic Acid in Vinegar		281
14.3	Types of Vinegar		281
14.4	Organisms Involved		282
14.5	Manufacture of Vinegar		283
14.5.1	The Orleans (or slow) method	283	
14.5.2	The trickling generators (quick) method	284	
14.5.3	Submerged generators	286	
14.6	Processing of Vinegar		288
	Suggested Readings	289	
SECTION E USE OF WHOLE CELLS FOR FOOD RELATED PURPOSES			
15.	Single Cell Protein (SCP)		293
15.1	Substrates for Single Cell Protein Production		294
15.1.1	Hydrocarbons	294	
15.1.2	Alcohols	297	
15.1.3	Waste products	298	
15.2	Microorganisms Used in SCP Production		300
15.3	Use of Autotrophic Microorganisms in SCP Production		300
15.4	Safety of Single Cell Protein		303
15.4.1	Nucleic acids and their removal from SCP	304	
15.5	Nutritional Value of Single Cell Protein		305
	Suggested Readings	305	
16.	Yeast Production		306
16.1	Production of Baker's Yeast		306
16.1.1	Yeast strain used	308	
16.1.2	Culture maintenance	309	
16.1.3	Factory production	309	
16.2	Food Yeasts		311
16.2.1	Production of food yeast	312	
16.3	Feed Yeasts		313
16.4	Alcohol Yeasts		314

16.5 Yeast Products	314
<i>Suggested Readings</i>	314
17. Production of Microbial Insecticides	315
17.1 Alternatives to Chemical Insecticides	315
17.2 Biological Control of Insects	316
17.2.1 <i>Desirable properties in organisms to be used for biological control</i>	317
17.2.2 <i>Candidates which have been considered as biological control agents</i>	318
17.2.3 <i>Bacillus thuringiensis Insecticidal toxin</i>	321
17.3 Production of Biological Insecticides	322
17.3.1 <i>Submerged fermentations</i>	322
17.3.2 <i>Surface culture</i>	323
17.3.3 <i>In vivo culture</i>	323
17.4 Bioassay of Biological Insecticides	323
17.5 Formulation and Use of Bioinsecticides	324
17.5.1 <i>Dusts</i>	324
17.5.2 <i>Liquid formulation</i>	324
17.6 Safety Testing of Bioinsecticides	325
17.7 Search and Development of New Bioinsecticides	325
<i>Suggested Readings</i>	326
18. The Manufacture of Rhizobium Inoculants	327
18.1 Biology of Rhizobium	328
18.1.1 <i>General properties</i>	328
18.1.2 <i>Cross-inoculation groups of rhizobium</i>	328
18.1.3 <i>Properties desirable in strains to be selected for use as rhizobium inoculants</i>	328
18.1.4 <i>Selection of strains for use as rhizobial inoculants</i>	329
18.2 Fermentation of Rhizobia	330
18.3 Inoculant Packaging for Use	331
18.3.1 <i>Seed inoculants</i>	331
18.3.2 <i>Soil inoculants</i>	332
18.4 Quality Control	333
<i>Suggested Readings</i>	333
19. Production of Fermented Foods	334
19.1 Introduction	334
19.2 Fermented Food from Wheat: Bread	335
19.2.1 <i>Ingredients for modern bread-making</i>	335
19.2.2 <i>Systems of bread-making</i>	339
19.2.3 <i>Role of yeasts in bread-making</i>	340
19.3 Fermented Foods Made from Milk	343
19.3.1 <i>Composition of milk</i>	343

19.3.2	<i>Cheese</i>	344	
19.3.3	<i>Yoghurt and fermented milk foods</i>	347	
19.4	Fermented Foods from Corn		348
19.4.1	<i>Ogi, koko, mahewu</i>	349	
19.5	Fermented Foods from Cassava: Garri, Foo-Foo, Chikwuange, Kokonte, Bikedi, and Cinguada		350
19.5.1	<i>Garri</i>	351	
19.5.2	<i>Foo-foo, chikwuangue, lafun, kokonte, bikedi, and cinguada</i>	352	
19.6	Fermented Vegetables		353
19.6.1	<i>Sauerkraut</i>	353	
19.6.2	<i>Cucumbers (pickling)</i>	353	
19.7	Fermentations for the Production of the Stimulant Beverages: Tea, Coffee, and Cocoa		354
19.7.1	<i>Tea production</i>	354	
19.7.2	<i>Coffee fermentation</i>	354	
19.7.3	<i>Cocoa fermentation</i>	355	
19.8	Fermented Foods Derived from Legumes and Oil Seeds		355
19.8.1	<i>Fermented foods from Soybeans</i>	355	
19.8.2	<i>Fermented foods from beans: Idli</i>	359	
19.8.3	<i>Fermented foods from Protein-rich Oil-seeds</i>	360	
19.8.4	<i>Food condiments made from fish</i>	360	
	<i>Suggested Readings</i>	360	
SECTION F PRODUCTION OF METABOLITES AS BULK CHEMICALS OR AS INPUTS IN OTHER PROCESSES			
20.	Production of Organic Acids and Industrial Alcohol		365
20.1	Organic Acids		365
20.1.1	<i>Production of citric acid</i>	365	
20.1.2	<i>Uses of citric acid</i>	365	
20.1.3	<i>Biochemical basis of the production of citric acid</i>	366	
20.1.4	<i>Fermentation for citric acid production</i>	368	
20.1.5	<i>Extraction</i>	368	
20.1.6	<i>Lactic acid</i>	369	
20.2	Industrial Alcohol Production		373
20.2.1	<i>Properties of ethanol</i>	373	
20.2.2	<i>Uses of ethanol</i>	374	
20.2.3	<i>Denatured alcohol</i>	374	
20.2.4	<i>Manufacture of ethanol</i>	374	
20.2.5	<i>Some developments in alcohol production</i>	377	
	<i>Suggested Readings</i>	379	
21.	Production of Amino Acids by Fermentation		380
21.1	Uses of Amino Acids		380

21.2	Methods for the Manufacture of Amino Acids	384	
21.2.1	<i>Semi-fermentation</i>	386	
21.2.2	<i>Enzymatic process</i>	386	
21.2.3	<i>Production of amino acids by the direct fermentation</i>	388	
21.3	Production of Glutamic Acid by Wild Type Bacteria		388
21.4	Production of Amino Acids by Mutants		389
21.4.1	<i>Production of amino acids by auxotrophic mutants</i>	390	
21.4.2	<i>Production of amino acids by regulatory mutants</i>	390	
21.5	Improvements in the Production of Amino Acids Using Metabolically Engineered Organisms		391
21.5.1	<i>Strategies to modify the terminal pathways</i>	392	
21.5.2	<i>Strategies for increasing precursor availability</i>	393	
21.5.3	<i>Metabolic engineering to improve transport of amino acids outside the cell</i>	394	
21.6	Fermentor Production of Amino Acid		394
21.6.1	<i>Fermentor procedure</i>	394	
21.6.2	<i>Raw materials</i>	395	
21.6.3	<i>Production strains</i>	395	
21.6.4	<i>Down stream processing</i>	396	
	<i>Suggested Readings</i>	396	
22.	Biocatalysts: Immobilized Enzymes and Immobilized Cells		398
22.1	Rationale for Use of Enzymes from Microorganisms		398
22.2	Classification of Enzymes		399
22.3	Uses of Enzymes in Industry		400
22.4	Production of Enzymes		406
22.4.1	<i>Fermentation for enzyme production</i>	406	
22.4.2	<i>Enzyme extraction</i>	408	
22.4.3	<i>Packaging and finishing</i>	408	
22.4.4	<i>Toxicity testing and standardization</i>	408	
22.5	Immobilized Biocatalysts: Enzymes and Cells		408
22.5.1	<i>Advantages of immobilized biocatalysts in general</i>	409	
22.5.2	<i>Methods of immobilizing enzymes</i>	409	
22.5.3	<i>Methods for the immobilization of cells</i>	412	
22.6	Bioreactors Designs for Usage in Biocatalysis		414
22.7	Practical Application of Immobilized Biological Catalyst Systems		416
22.8	Manipulation of Microorganisms for Higher Yield of Enzymes		416
22.8.1	<i>Some aspects of the biology of extracellular enzyme production</i>	417	
	<i>Suggested Readings</i>	419	
23.	Mining Microbiology: Ore Leaching (Bioleaching) by Microorganisms		421
23.1	Bioleaching		421
23.2	Commercial Leaching Methods		422
23.2.1	<i>Irrigation-type processes</i>	422	
23.2.2	<i>Stirred tank processes</i>	423	

23.3	Microbiology of the Leaching Process	423
23.4	Leaching of Some Metal Sulfides	424
23.5	Environmental Conditions Affecting Bacterial Leaching	425
	<i>Suggested Readings</i> 426	
SECTION G PRODUCTION OF COMMODITIES OF MEDICAL IMPORTANCE		
24.	Production of Antibiotics and Anti-Tumor Agents	429
24.1	Classification and Nomenclature of Antibiotics	429
24.2	Beta-Lactam Antibiotics	430
24.2.1	<i>Penicillins</i> 432	
24.2.2	<i>Cephalosporins</i> 435	
24.2.3	<i>Other beta-lactam antibiotics</i> 438	
24.3	The Search for New Antibiotics	439
24.3.1	<i>The need for new antibiotics</i> 439	
24.3.2	<i>The classical method for searching for antibiotics: random search in the soil</i> 440	
24.4	Combating Resistance and Expanding the Effectiveness of Existing Antibiotics	444
24.4.1	<i>Refinements in the procedures for the random search for new antibiotics in the soil</i> 444	
24.4.2	<i>Newer approaches to searching for antibiotics</i> 445	
24.5	Anti-Tumor Antibiotics	448
24.5.1	<i>Nature of tumors</i> 448	
24.5.2	<i>Mode of action of anti-tumor antibiotics</i> 449	
24.5.3	<i>Search for new anti-tumor antibiotics</i> 449	
24.6	Newer Methods for Searching for Antibiotic and Anti-tumor Drugs	453
	<i>Suggested Readings</i> 453	
25.	Production of Ergot Alkaloids	455
25.1	Nature of Ergot Alkaloids	455
25.2	Uses of Ergot Alkaloids and their Derivates	457
25.3	Production of Ergot Alkaloids	459
25.4	Physiology of Alkaloid Production	461
	<i>Suggested Readings</i> 463	
26.	Microbial Transformation and Steroids and Sterols	464
26.1	Nature and Use of Steroids and Sterols	464
26.2	Uses of Steroids and Sterols	466
26.2.1	<i>Sex hormones</i> 466	
26.2.2	<i>Corticosteroids</i> 467	
26.2.3	<i>Saponins</i> 467	
26.2.4	<i>Heterocyclic steroids</i> 467	
26.3	Manufacture of Steroids	467
26.3.1	<i>Types of microbial transformations in steroids and sterols</i> 469	

23.3	Microbiology of the Leaching Process	423
23.4	Leaching of Some Metal Sulfides	424
23.5	Environmental Conditions Affecting Bacterial Leaching	425
	<i>Suggested Readings</i>	426
SECTION G PRODUCTION OF COMMODITIES OF MEDICAL IMPORTANCE		
24.	Production of Antibiotics and Anti-Tumor Agents	429
24.1	Classification and Nomenclature of Antibiotics	429
24.2	Beta-Lactam Antibiotics	430
	24.2.1 <i>Penicillins</i>	432
	24.2.2 <i>Cephalosporins</i>	435
	24.2.3 <i>Other beta-lactam antibiotics</i>	438
24.3	The Search for New Antibiotics	439
	24.3.1 <i>The need for new antibiotics</i>	439
	24.3.2 <i>The classical method for searching for antibiotics: random search in the soil</i>	440
24.4	Combating Resistance and Expanding the Effectiveness of Existing Antibiotics	444
	24.4.1 <i>Refinements in the procedures for the random search for new antibiotics in the soil</i>	444
	24.4.2 <i>Newer approaches to searching for antibiotics</i>	445
24.5	Anti-Tumor Antibiotics	448
	24.5.1 <i>Nature of tumors</i>	448
	24.5.2 <i>Mode of action of anti-tumor antibiotics</i>	449
	24.5.3 <i>Search for new anti-tumor antibiotics</i>	449
24.6	Newer Methods for Searching for Antibiotic and Anti-tumor Drugs	453
	<i>Suggested Readings</i>	453
25.	Production of Ergot Alkaloids	455
25.1	Nature of Ergot Alkaloids	455
25.2	Uses of Ergot Alkaloids and their Derivates	457
25.3	Production of Ergot Alkaloids	459
25.4	Physiology of Alkaloid Production	461
	<i>Suggested Readings</i>	463
26.	Microbial Transformation and Steroids and Sterols	464
26.1	Nature and Use of Steroids and Sterols	464
26.2	Uses of Steroids and Sterols	466
	26.2.1 <i>Sex hormones</i>	466
	26.2.2 <i>Corticosteroids</i>	467
	26.2.3 <i>Saponins</i>	467
	26.2.4 <i>Heterocyclic steroids</i>	467
26.3	Manufacture of Steroids	467
	26.3.1 <i>Types of microbial transformations in steroids and sterols</i>	469

26.3.2	<i>Fermentation conditions used in steroid transformation</i>	470
26.4	Screening for Microorganisms	471
	<i>Suggested Readings</i>	471
27.	Vaccines	472
27.1	Nature and Importance of Vaccines	472
27.2	Body Defenses against Communicable Diseases	472
27.2.1	<i>Innate or non-specific immunity</i>	475
27.3	Traditional and Modern Methods of Vaccine Production	479
27.3.1	<i>Traditional vaccines</i>	479
27.3.2	<i>Newer approaches in vaccinology</i>	480
27.4	Production of Vaccines	482
27.4.1	<i>Production of virus vaccines</i>	482
27.4.2	<i>Production of bacterial toxoids</i>	485
27.4.3	<i>Production of killed bacterial vaccines</i>	485
27.5	Control of Vaccines	486
27.6	Vaccine Production versus Other Aspects of Industrial Microbiology	487
	<i>Suggested Readings</i>	487
28.	Drug Discovery in Microbial Metabolites: The Search for Microbial Products with Bioactive Properties	488
28.1	Conventional Processes of Drug Discovery	489
28.1.1	<i>Cell-based assays</i>	489
28.1.2	<i>Receptor binding assays</i>	491
28.1.3	<i>Enzyme assays</i>	491
28.2	Newer Methods of Drug Discovery	492
28.2.1	<i>Computer aided drug design</i>	492
28.2.2	<i>Combinatorial chemistry</i>	493
28.2.3	<i>Genomic methods in the search for new drugs, including antibiotics</i>	494
28.2.4	<i>Search for drugs among unculturable microorganisms</i>	496
28.4	Approval of New Antibiotic and other Drugs by the Regulating Agency	497
28.4.1	<i>Pre-submission work by the pharmaceutical firm</i>	497
28.4.2	<i>Submission of the new drug to the FDA</i>	499
28.4.3	<i>Approval</i>	500
28.4.4	<i>Post approval research</i>	501
	<i>Suggested Readings</i>	501

SECTION H WASTE DISPOSAL

29.	Treatment of Wastes in Industry	505
29.1	Methods for the Determination of Organic Matter Content in Waste Waters	505
29.1.1	<i>Dissolved oxygen</i>	506
29.1.2	<i>The biological or biochemical oxygen demand (BOD) tests</i>	506
29.1.3	<i>Permanganate value (PV) test</i>	506

29.1.4	Chemical oxygen demand (COD)	507
29.1.5	Total organic carbon (TOC)	507
29.1.6	Total suspended solids (TSS)	507
29.1.7	Volatile suspended solids (VSS)	507
29.2	Wastes from Major Industries	508
29.3	Systems for the Treatment of Wastes	509
29.3.1	Aerobic breakdown of raw waste waters	509
29.4	Treatment of the Sludge: Anaerobic Breakdown of Sludge	516
29.5	Waste Water Disposal in the Pharmaceutical Industry	517
	Suggested Readings	519
	Glossary	520
	Index	523
28.1	Conventional Processes of Drug Discovery	489
28.1.1	Cell-based assays	489
28.1.2	Receptor binding assays	491
28.1.3	Enzyme assays	491
28.2	Newer Methods of Drug Discovery	492
28.2.1	Computer aided drug design	492
28.2.2	Combinatorial chemistry	493
28.2.3	Genomic methods in the search for new drugs	494
28.2.4	Search for drugs among unclonable microorganisms	495
28A	Approval of New Antibiotic and other Drugs by the Regulatory Agency	497
28A.1	Pre-submission work by the pharmaceutical firm	497
28A.2	Submission of the new drug to the FDA	497
28A.3	Approval	500
28A.4	Post approval research	501
	Suggested Readings	501
