Contents

<i>Preface</i>	ix
1 Introduction	1
1.1 A Brief Review of Sensory Analysis Methodologies	1
1.2 Method, Test, and Measurement	2
1.3 Standard Discrimination Methods	2
1.4 Classification of Sensory Discrimination Methods	3
References	5
2 Standard Discrimination Tests	6
2.1 Binomial Model for Discrimination Testing	6
2.2 Discrimination Tests Using Forced-Choice Methods	7
2.3 Discrimination Tests Using the Methods with Response Bias	12
References	20
3 Statistical Power Analysis for Standard Discrimination Tests	21
3.1 Introduction	21
3.2 Power and Sample Size for Forced-Choice Methods	22
3.3 Power and Sample Size for the Methods with Response Bias	27
3.4 Efficiency Comparisons of Discrimination Tests	38
References	44
4 Modified Discrimination Tests	45
4.1 The Modified Triangle Test	45
4.2 The Degree of Difference Test	56
4.3 The Double Discrimination Test	61
4.4 The Preference Test with "No Preference" Option	72
References	76
5 Multiple-Sample Discrimination Tests	78
5.1 Multiple-Sample Comparison Based on Proportions	78
5.2 Multiple-Sample Comparison Based on Ranks	82
5.3 Multiple-Sample Comparison Based on Categorical Scales	98
References	104
6 Replicated Discrimination Tests: Beta-Binomial Model	106
6.1 Introduction	106
6.2 The Beta-Binomial Distribution	108
6.3 Estimation of Parameters of Beta-Binomial Model	109

6.4	Applications of Beta-Binomial Model in Replicated Tests	113
6.5	Testing Power and Sample Size for Beta-Binomial Tests	122
	References	127
	Appendix 6A	129
7	Replicated Discrimination Tests: Corrected Beta-Binomial Model	138
7.1	Introduction	138
7.2	The Corrected Beta-Binomial Distribution	138
7.3	Estimation of Parameters of Corrected Beta-Binomial Model	142
7.4	Statistical Testing for Parameters in Corrected Beta-Binomial Model	146
7.5	Testing Power and Sample Size	148
	References	150
	Appendix 7A	151
8	Replicated Discrimination Tests: Dirichlet-Multinomial Model	163
8.1	The Dirichlet-Multinomial Distribution	163
8.2	Estimation of Parameters of Dirichlet-Multinomial Model	165
8.3	Applications of DM model in Replicated Tests	167
8.4	Testing Power for Dirichlet-Multinomial Model	179
	References	182
9	Measurements of Sensory Difference: Thurstonian Model	184
9.1	Introduction	184
9.2	Thurstonian δ	185
9.3	Variance of d'	190
9.4	Tables for d' and Variance of d'	237
	References	240
10	Statistical Analysis for d' Data	243
10.1	Estimates of Population or Group d'	243
10.2	Statistical Inference for d' Data	248
	References	254
11	Similarity Testing	255
11.1	Introduction	255
11.2	Similarity Testing for Preference	256
11.3	Similarity Testing Using Forced-Choice Methods	259
11.4	Similarity Testing Using the A-Not A and the Same-Different Methods	261
	References	268
	Appendix 11A	269
Appendix A	List of S-Plus Codes	287
	<i>Author Index</i>	289
	<i>Subject Index</i>	293
