

# CONTENTS

FOREWORD	VII
<i>Edward O. Wilson</i>	
PROLOGUE	IX
<i>Kofi Annan</i>	
1. WHAT IS BIODIVERSITY?	3
<i>Stuart L. Pimm, Maria Alice S. Alves, Eric Chivian, and Aaron Bernstein</i>	
Determining Rates of Species Extinction	12
Secondary Extinctions	24
The Loss of Populations and Genes	24
Conclusion	25
Suggested Readings	26
2. HOW IS BIODIVERSITY THREATENED BY HUMAN ACTIVITY?	29
<i>Eric Chivian and Aaron Bernstein</i>	
Habitat Loss: On Land	30
Habitat Loss: In the Oceans	35
Habitat Loss: Fresh Water	38
Overexploitation	42
Introduced Species	47
Infectious Diseases	50
Pollution	51
Ultraviolet Radiation	60
War and Conflict	61
Global Climate Change	63
Suggested Readings	73

<b>3. ECOSYSTEM SERVICES</b>	<b>75</b>
<i>Jerry Melillo and Osvaldo Sala</i>	
The Character of Ecosystem Services	76
The Economic Value of Ecosystem Services	102
Threats to Ecosystem Services	107
Conclusion	114
Suggested Readings	115
<b>4. MEDICINES FROM NATURE</b>	<b>117</b>
<i>David J. Newman, John Kilama, Aaron Bernstein, and Eric Chivian</i>	
Why Natural Medicines?	118
The History of Natural Products as Medicines	119
The Role of Traditional Medicine in Drug Discovery	123
South American Indigenous Medicines	126
A Review of Some Medicines Derived from Nature	128
Herbal Medicines in Industrialized Countries	151
Potential Medicines in Food	154
Natural Products as Insecticides and Fungicides	155
Conclusion	160
Suggested Readings	161
<b>5. BIODIVERSITY AND BIOMEDICAL RESEARCH</b>	<b>163</b>
<i>Eric Chivian, Aaron Bernstein, and Joshua P. Rosenthal</i>	
A Brief History of Biomedical Research	165
The Role of Animals and Microbes in Biomedical Research	169
Conclusion	201
Suggested Readings	201
<b>6. THREATENED GROUPS OF ORGANISMS VALUABLE TO MEDICINE</b>	<b>203</b>
<i>Eric Chivian and Aaron Bernstein</i>	
Amphibians	204
Bears	223
Primates	231
Gymnosperms	249
Cone Snails	257
Sharks	266
Horseshoe Crabs	278
Conclusion	283
Suggested Readings	283

<b>7.</b>	<b>ECOSYSTEM DISTURBANCE, BIODIVERSITY LOSS, AND HUMAN INFECTIOUS DISEASE</b>	<b>287</b>
	<i>David H. Molyneux, Richard S. Ostfeld, Aaron Bernstein, and Eric Chivian</i>	
	Ecosystem Disturbances and Their Effects on Infectious Diseases	288
	Vector, Pathogen, and Host Diversity and Human Infectious Disease	306
	Biological Controls	312
	Species Exploitation and the Consumption of Bushmeat	315
	Climate Change and Its Effects on Infectious Diseases	318
	Conclusion	322
	Suggested Readings	323
<b>8.</b>	<b>BIODIVERSITY AND FOOD PRODUCTION</b>	<b>325</b>
	<i>Daniel Hillel and Cynthia Rosenzweig</i>	
	Historical Background	326
	Agriculture	329
	Livestock Production	354
	Food from Aquatic Systems	367
	Conclusion	380
	Suggested Readings	381
<b>9.</b>	<b>GENETICALLY MODIFIED FOODS AND ORGANIC FARMING</b>	<b>383</b>
	<i>Eric Chivian and Aaron Bernstein</i>	
	Genetically Modified Foods	383
	Organic Farming	395
	Integrated Farming	400
	Conclusion	404
	Suggested Readings	405
<b>10.</b>	<b>WHAT INDIVIDUALS CAN DO TO HELP CONSERVE BIODIVERSITY</b>	<b>407</b>
	<i>Jeffrey A. McNeely, Eleanor Sterling, and Kalemari Jo Mulongoy</i>	
	What Are We Doing to Our Planet?	407
	Why Do We Consume So Much?	409
	How Can We Conserve Biodiversity?	410
	Some Collective Actions That Have Made a Difference	426
	Individuals Who Have Made a Difference	427
	Ten Things We All Can Do That Can Help Conserve Biodiversity	428
	Suggested Readings	429

APPENDIX A	430
Co-sponsors of <i>Sustaining Life:</i> <i>How Human Health Depends on Biodiversity</i>	
APPENDIX B	432
Treaties, Conventions, and Intergovernmental Organizations for the Conservation of Biodiversity	
APPENDIX C	437
Nongovernmental Organizations Working to Conserve Biodiversity
