
Contents

SECTION I: MODELING TECHNIQUES

Chapter 1

Introduction	3
--------------------	---

Charles E. Baukal, Jr.

Chapter 2

CFD Modeling	33
--------------------	----

Charles E. Baukal, Jr.

Chapter 3

Unstructured Mesh Methods for Combustion Problems.....	61
--	----

Jayathi Y. Murthy and Sanjay R. Mathur

Chapter 4

PCGC-3	95
--------------	----

Scott C. Hill, Andrew M. Eaton, and L. Douglas Smoot

Chapter 5

Local Integral Moment (LIM) Simulations.....	161
--	-----

Werner J. A. Dahm, Grétar Tryggvason, Richard D. Frederiksen, and Mark J. Stock

Chapter 6

Modeling Coflow Diffusion Flames with Local Mesh Refinement.....	209
--	-----

Mitchell D. Smooke and Beth Anne V. Bennett

SECTION II: INDUSTRIAL APPLICATIONS

Chapter 7

CFD in Burner Development.....	249
--------------------------------	-----

Vladimir Y. Gershtein and Charles E. Baukal, Jr.

Chapter 8

CFD Modeling for the Steel Industry	287
---	-----

Xianming Li

Chapter 9

Aluminum Industry	331
-------------------------	-----

Vladimir Y. Gershtein and Charles E. Baukal, Jr.

Chapter 10

CFD Modeling for the Glass Industry.....411
Bryan C. Hoke, Jr. and Petr Schill

Chapter 11

Modeling Impinging Flame Jets.....455
Charles E. Baukal, Jr.

Chapter 12

Gas Turbines497
D. Scott Crocker

Chapter 13

CFD Modeling in the Petrochemical Industry.....535
Michael Henneke

SECTION III: ADVANCED TECHNIQUES

Chapter 14

Design Optimization.....557
Richard W. Johnson, Mark D. Landon, and Ernest C. Perry

Chapter 15

Virtual Reality Simulations.....585
Lori Freitag

Index.....611
