

# Contents

## Block 1 Introduction

- Module 1.1 Steam - The Energy Fluid
- Module 1.2 Steam and the Organisation
- Module 1.3 The Steam and Condensate Loop

## Block 2 Steam Engineering Principles and Heat Transfer

- Module 2.1 Engineering Units
- Module 2.2 What is Steam?
- Module 2.3 Superheated Steam
- Module 2.4 Steam Quality
- Module 2.5 Heat Transfer
- Module 2.6 Methods of Estimating Steam Consumption
- Module 2.7 Measurement of Steam Consumption
- Module 2.8 Thermal Rating
- Module 2.9 Energy Consumption of Tanks and Vats
- Module 2.10 Heating with Coils and Jackets
- Module 2.11 Heating Vats and Tanks by Steam Injection
- Module 2.12 Steam Consumption of Pipes and Air Heaters
- Module 2.13 Steam Consumption of Heat Exchangers
- Module 2.14 Steam Consumption of Plant Items
- Module 2.15 Entropy - A Basic Understanding
- Module 2.16 Entropy - Its Practical Use

## Block 3 The Boiler House

- Module 3.1 Introduction
- Module 3.2 Shell Boilers
- Module 3.3 Water-tube Boilers
- Module 3.4 Miscellaneous Boiler Types, Economisers and Superheaters
- Module 3.5 Boiler Ratings
- Module 3.6 Boiler Efficiency and Combustion
- Module 3.7 Boiler Fittings and Mountings
- Module 3.8 Steam Headers and Off-takes
- Module 3.9 Water Treatment, Storage and Blowdown for Steam Boilers
- Module 3.10 Water for the Boiler
- Module 3.11 The Feedtank and Feedwater Conditioning
- Module 3.12 Controlling TDS in the Boiler Water
- Module 3.13 Heat Recovery from Boiler Blowdown (TDS control only)
- Module 3.14 Bottom Blowdown
- Module 3.15 Water Levels in Steam Boilers
- Module 3.16 Methods of Detecting Water Level in Steam Boilers
- Module 3.17 Automatic Level Control Systems
- Module 3.18 Water Level Alarms
- Module 3.19 Installation of Level Controls
- Module 3.20 Testing Requirements in the Boiler House
- Module 3.21 Pressurised Deaerators
- Module 3.22 Steam Accumulators

#### **Block 4 Flowmetering**

- Module 4.1 Fluids and Flow
- Module 4.2 Principles of Flowmetering
- Module 4.3 Types of Steam Flowmeter
- Module 4.4 Instrumentation
- Module 4.5 Installation

#### **Block 5 Basic Control Theory**

- Module 5.1 An Introduction to Controls
- Module 5.2 Basic Control Theory
- Module 5.3 Control Loops and Dynamics
- Module 5.4 Choice and Selection of Controls
- Module 5.5 Installation and Commissioning of Controls
- Module 5.6 Computers in Control

#### **Block 6 Control Hardware: Electric/Pneumatic Actuation**

- Module 6.1 Control Valves
- Module 6.2 Control Valve Capacity
- Module 6.3 Control Valve Sizing for Water Systems
- Module 6.4 Control Valve sizing for Steam Systems
- Module 6.5 Control Valve Characteristics
- Module 6.6 Control Valve Actuators and Positioners
- Module 6.7 Controllers and Sensors

#### **Block 7 Control Hardware: Self-acting Actuation**

- Module 7.1 Self-acting Temperature Controls
- Module 7.2 Typical Self-acting Temperature Control Valves and Systems
- Module 7.3 Self-acting Pressure Controls and Applications

#### **Block 8 Control Applications**

- Module 8.1 Pressure Control Applications
- Module 8.2 Temperature Control for Steam Applications
- Module 8.3 Level and Flow Control Applications
- Module 8.4 Control Installations

#### **Block 9 Safety Valves**

- Module 9.1 Introduction to Safety Valves
- Module 9.2 Types of Safety Valve
- Module 9.3 Safety Valve Selection
- Module 9.4 Safety Valve Sizing
- Module 9.5 Safety Valve Installation
- Module 9.6 Alternative Plant Protection Devices and Terminology

#### **Block 10 Steam Distribution**

- Module 10.1 Introduction to Steam Distribution
- Module 10.2 Pipes and Pipe Sizing
- Module 10.3 Steam Mains and Drainage
- Module 10.4 Pipe Expansion and Support
- Module 10.5 Air Venting, Heat Losses and a Summary of Various Pipe Related Standards

## **Block 11 Steam Traps and Steam Trapping**

- Module 11.1 Introduction - Why Steam Traps?
- Module 11.2 Thermostatic Steam Traps
- Module 11.3 Mechanical Steam Traps
- Module 11.4 Thermodynamic Steam Traps
- Module 11.5 Considerations for Selecting Steam Traps
- Module 11.6 Selecting Steam Traps - Canteen Equipment; Oil Transfer/Storage; Hospital Equipment
- Module 11.7 Selecting Steam Traps - Industrial Dryers
- Module 11.8 Selecting Steam Traps - Laundries, Presses
- Module 11.9 Selecting Steam Traps - Process Equipment
- Module 11.10 Selecting Steam Traps - Space Heating Equipment
- Module 11.11 Selecting Steam Traps - Steam Mains; Tanks and Vats, Pressure Reducing Valves
- Module 11.12 Air Venting Theory
- Module 11.13 Air Venting Applications
- Module 11.14 Testing and Maintenance of Steam Traps
- Module 11.15 Energy Losses in Steam Traps

## **Block 12 Pipeline Ancillaries**

- Module 12.1 Isolation Valves - Linear Movement
- Module 12.2 Isolation Valves - Rotary Movement
- Module 12.3 Check Valves
- Module 12.4 Strainers
- Module 12.5 Separators
- Module 12.6 Gauges, Sight Glasses and Vacuum Breakers

## **Block 13 Condensate Removal**

- Module 13.1 Heat Exchangers and Stall
- Module 13.2 The Heat Load, Heat Exchanger and Steam Load Relationship
- Module 13.3 Oversized Heat Exchangers
- Module 13.4 Example: Selecting the Trap
- Module 13.5 The Stall Chart - Constant Flow Secondary
  - Varying Inlet Temperature
  - Constant Outlet Temperature
- Module 13.6 The Stall Chart - Varying Flow Secondary
  - Constant Inlet Temperature
  - Constant Outlet Temperature
- Module 13.7 The Stall Chart - Constant Flow Secondary
  - Varying Inlet Temperature
  - Varying Outlet Temperature
- Module 13.8 Practical Methods of Preventing Stall

## **Block 14 Condensate Recovery**

- Module 14.1 Introduction to Condensate Recovery
- Module 14.2 Layout of Condensate Return Lines
- Module 14.3 Sizing Condensate Return Lines
- Module 14.4 Pumping Condensate from Vented Receivers
- Module 14.5 Lifting Condensate and Contaminated Condensate
- Module 14.6 Flash Steam

## **Block 15 Desuperheating**

- Module 15.1 Basic Desuperheating Theory
- Module 15.2 Basic Desuperheater Types
- Module 15.3 Other Types of Desuperheater
- Module 15.4 Typical Desuperheater Installations

## **Block 16 Equations**

- Module 16.1 Equations

## **Index**
