AN INTRODUCTION TO Environmental Biophysics

SECOND EDITION

GAYLON S. CAMPBELL JOHN M. NORMAN

Gaylon S. Campbell John M. Norman

An Introduction to Environmental Biophysics

Second Edition

With 81 Illustrations

Gaylon S. Campbell Decagon Devices, Inc. 950 NE Nelson Ct. Pullman, WA 99163 USA John M. Norman University of Wisconsin College of Agricultural and Life Sciences Soils Madison, WI 53705 USA

Library of Congress Cataloging-in-Publication Data Campbell, Gaylon S.

Introduction to environmental biophysics/G. S. Campbell, J. M.

Norman. -- 2nd ed.

p. cm.

Includes bibliographical references and index.

ISBN 978-0-387-94937-6 ISBN 978-1-4612-1626-1 (eBook)

DOI 10.1007/978-1-4612-1626-1

1. Biophysics. 2. Ecology. I. Norman, John M. II. Title.

Preface to the Second Edition	v
Preface to the First Edition	ix
List of Symbols	xvii
Chapter 1 Introduction	1
1.1 Microenvironments	3
1.2 Energy Exchange	3
1.3 Mass and Momentum Transport	4
1.4 Conservation of Energy and Mass	4
1.5 Continuity in the Biosphere	5
1.6 Models, Heterogeneity, and Scale	7
1.7 Applications	9
1.8 Units	9
References	13
Problems	13
Chapter 2 Temperature	15
2.1 Typical Behavior of Atmospheric and Soil Temperature	15
2.1 Typical Behavior of Atmospheric and Soil Temperature2.2 Random Temperature Variation	15 18
2.2 Random Temperature Variation	
2.2 Random Temperature Variation2.3 Modeling Vertical Variation in Air Temperature	18
2.2 Random Temperature Variation2.3 Modeling Vertical Variation in Air Temperature2.4 Modeling Temporal Variation in Air Temperature	18 20 23
2.2 Random Temperature Variation2.3 Modeling Vertical Variation in Air Temperature2.4 Modeling Temporal Variation in Air Temperature2.5 Soil Temperature Changes with Depth and Time	18 20
2.2 Random Temperature Variation2.3 Modeling Vertical Variation in Air Temperature2.4 Modeling Temporal Variation in Air Temperature	18 20 23 23
 2.2 Random Temperature Variation 2.3 Modeling Vertical Variation in Air Temperature 2.4 Modeling Temporal Variation in Air Temperature 2.5 Soil Temperature Changes with Depth and Time 2.6 Temperature and Biological Development 	18 20 23 23 26
 2.2 Random Temperature Variation 2.3 Modeling Vertical Variation in Air Temperature 2.4 Modeling Temporal Variation in Air Temperature 2.5 Soil Temperature Changes with Depth and Time 2.6 Temperature and Biological Development 2.7 Thermal Time 2.8 Calculating Thermal Time from Weather Data 	18 20 23 23 26 28
 2.2 Random Temperature Variation 2.3 Modeling Vertical Variation in Air Temperature 2.4 Modeling Temporal Variation in Air Temperature 2.5 Soil Temperature Changes with Depth and Time 2.6 Temperature and Biological Development 2.7 Thermal Time 	18 20 23 23 26 28 30
 2.2 Random Temperature Variation 2.3 Modeling Vertical Variation in Air Temperature 2.4 Modeling Temporal Variation in Air Temperature 2.5 Soil Temperature Changes with Depth and Time 2.6 Temperature and Biological Development 2.7 Thermal Time 2.8 Calculating Thermal Time from Weather Data 2.9 Temperature Extremes and the Computation of Thermal 	18 20 23 23 26 28 30
 2.2 Random Temperature Variation 2.3 Modeling Vertical Variation in Air Temperature 2.4 Modeling Temporal Variation in Air Temperature 2.5 Soil Temperature Changes with Depth and Time 2.6 Temperature and Biological Development 2.7 Thermal Time 2.8 Calculating Thermal Time from Weather Data 2.9 Temperature Extremes and the Computation of Thermal Time 	18 20 23 23 26 28 30
 2.2 Random Temperature Variation 2.3 Modeling Vertical Variation in Air Temperature 2.4 Modeling Temporal Variation in Air Temperature 2.5 Soil Temperature Changes with Depth and Time 2.6 Temperature and Biological Development 2.7 Thermal Time 2.8 Calculating Thermal Time from Weather Data 2.9 Temperature Extremes and the Computation of Thermal Time 2.10 Normalization of Thermal Time 	18 20 23 23 26 28 30 32
 2.2 Random Temperature Variation 2.3 Modeling Vertical Variation in Air Temperature 2.4 Modeling Temporal Variation in Air Temperature 2.5 Soil Temperature Changes with Depth and Time 2.6 Temperature and Biological Development 2.7 Thermal Time 2.8 Calculating Thermal Time from Weather Data 2.9 Temperature Extremes and the Computation of Thermal Time 2.10 Normalization of Thermal Time 2.11 Thermal Time in Relation To Other Environmental 	18 20 23 23 26 28 30

Chapter 3 Water Vapor and Other Gases	37
3.1 Specifying Gas Concentration	38
3.2 Water Vapor: Saturation Conditions	40
3.3 Condition of Partial Saturation	42
3.4 Spatial and Temporal Variation of Atmospheric Water	
Vapor	47
3.5 Estimating the Vapor Concentration in Air	49
References	50
Problems	50
Chapter 4 Liquid Water in Organisms and their Environment	53
4.1 Water Potential and Water Content	53
4.2 Water Potentials in Organisms and their Surroundings	58
4.3 Relation of Liquid- to Gas-Phase Water	58
References	61
Problems	61
	(2)
Chapter 5 Wind	63
5.1 Characteristics of Atmospheric Turbulence	64
5.2 Wind as a Vector	65
5.3 Modeling the Variation in Wind Speed	66
5.4 Finding the Zero Plane Displacement and the	
Roughness Length	68
5.5 Wind Within Crop Canopies	72
References	74
Problems	75
Chapter 6 Heat and Mass Transport	77
6.1 Molar Fluxes	78
6.2 Integration of the Transport Equations	79
6.3 Resistances and Conductances	79
6.4 Resistors and Conductors in Series	80
6.5 Resistors in Parallel	81
6.6 Calculation of Fluxes	81
Problems	85
Chapter 7 Conductances for Heat and Mass Transfer	87
7.1 Conductances for Molecular Diffusion	87
7.2 Molecular Diffusivities	88
7.3 Diffusive Conductance of the Integument	90
7.4 Turbulent Transport	93
7.5 Fetch and Buoyancy	96
7.6 Conductance of the Atmospheric Surface Layer	97
7.7 Conductances for Heat and Mass Transfer in	
Laminar Forced Convection	99
7.8 Cylinders, Spheres and Animal Shapes	102
7.9 Conductances in Free Convection	103

Contents xiii

7.12 Determining the Characteristic Dimension of an Object 7.13 Free Stream Turbulence Summary of Formulae for Conductance References Problems 110 Chapter 8 Heat Flow in the Soil 8.1 Heat Flow and Storage in Soil 8.2 Thermal Properties of Soils: Volumetric Heat Capacity 8.3 Thermal Properties of Soils: Volumetric Heat Capacity 8.4 Thermal Diffusivity and Admittance of Soils 8.5 Heat Transfer from Animals to a Substrate References Problems 128 Chapter 9 Water Flow in Soil 9.1 The Hydraulic Conductivity 9.2 Infiltration of Water into Soil 9.3 Redistribution of Water in Soil 9.3 Redistribution of Water in Soil 9.4 Evaporation from the Soil Surface 9.5 Transpiration and Plant Water Uptake 9.5 Transpiration and Plant Water Uptake 8.6 Ferences Problems 144 Chapter 10 Radiation Basics 147 10.1 The Electromagnetic Spectrum 10.2 Blackbody Radiation 10.3 Definitions 10.4 The Cosine Law 10.5 Attenuation of Radiation 10.6 Spectral Distribution of Blackbody Radiation 10.7 Spectral Distribution of Solar and Thermal Radiation 10.8 Radiant Emittance References Problems 11.1 Sun Angles and Daylength 11.2 Estimating Direct and Diffuse Short-wave Irradiance 11.3 Solar Radiation under Clouds 11.4 Radiation Balance 11.5	7.10 Combined Forced and Free Convection	105
7.13 Free Stream Turbulence Summary of Formulae for Conductance References Problems Chapter 8 Heat Flow in the Soil 8.1 Heat Flow and Storage in Soil 8.2 Thermal Properties of Soils: Volumetric Heat Capacity 8.3 Thermal Properties of Soils: Volumetric Heat Capacity 8.4 Thermal Diffusivity and Admittance of Soils 8.5 Heat Transfer from Animals to a Substrate References Problems Chapter 9 Water Flow in Soil 9.1 The Hydraulic Conductivity 9.2 Infiltration of Water into Soil 9.3 Redistribution of Water into Soil 9.4 Evaporation from the Soil Surface 9.5 Transpiration and Plant Water Uptake 9.6 The Water Balance References Problems 10.1 The Electromagnetic Spectrum 10.2 Blackbody Radiation 10.3 Definitions 10.4 The Cosine Law 10.5 Attenuation of Radiation 10.6 Spectral Distribution of Blackbody Radiation 10.7 Spectral Distribution of Solar and Thermal Radiation 10.8 Radiant Emittance References Problems 11.1 Sun Angles and Daylength 11.2 Estimating Direct and Diffuse Short-wave Irradiance 11.3 Solar Radiation under Clouds 11.4 Radiation Balance 11.5	7.11 Conductance Ratios	105
Summary of Formulae for Conductance 108	7.12 Determining the Characteristic Dimension of an	Object 106

Problems	184
Chapter 12 Animals and their Environment	185
12.1 The Energy Budget Concept	185
12.2 Metabolism	189
12.3 Latent Heat Exchange	190
12.4 Conduction of Heat in Animal Coats and Tissue	194
12.5 Qualitative Analysis of Animal Thermal response	197
12.6 Operative Temperature	198
12.7 Applications of the Energy Budget Equation	200
12.8 The Transient State	201
12.9 Complexities of Animal Energetics	202
12.10 Animals and Water	204
References	205
Problems	206
Chapter 13 Humans and their Environment	209
13.1 Area, Metabolic Rate, and Evaporation	209
13.2 Survival in Cold Environments	211
13.3 Wind Chill and Standard Operative Temperature	213
13.4 Survival in Hot Environments	215
13.5 The Humid Operative Temperature	219
13.6 Comfort	220
References	222
Problems	222
Chapter 14 Plants and Plant Communities	223
14.1 Leaf Temperature	224
14.2 Aerodynamic Temperature of Plant Canopies	229
14.3 Radiometric Temperature of Plant Canopies	230
14.4 Transpiration and the Leaf Energy Budget	231
14.5 Canopy Transpiration	233
14.6 Photosynthesis	235
14.7 Simple Assimilation Models	235
14.8 Biochemical Models for Assimilation	239
14.9 Control of Stomatal Conductance	241
14.10 Optimum Leaf Form	244

Problems	246
Chapter 15 The Light Environment of Plant Canopies	
15.1 Leaf Area Index and Light Transmission Through	n 0.47
Canopies	247
15.2 Detailed Models of Light Interception by Canopi	es 250
15.3 Transmission of Diffuse Radiation	254

15.4 Light Scattering in Canopies	255
15.5 Reflection of Light by Plant Canopies	255
15.6 Transmission of Radiation by Sparse Canopies—	
Soil Reflectance Effects	257
15.7 Daily Integration	258
15.8 Calculating the Flux Density of Radiation on	
Leaves in a Canopy	258
15.9 Calculating Canopy Assimilation from Leaf	
Assimilation	259
15.10 Remote Sensing of Canopy Cover and IPAR	264
15.11 Remote Sensing and Canopy Temperature	271
15.12 Canopy Reflectivity (Emissivity) versus Leaf	
Reflectivity (Emissivity)	273
15.13 Heterogeneous Canopies	273
15.14 Indirect Sensing of Canopy Architecture	275
